

# Zucchini

**A complete fertilization proposal, for providing an ideal ratio of macronutrients, trace elements and biostimulants for healthy, vigorous plants and high yields.**

**Leaf P-Ca** improves flowering and strengthens vegetal tissues, while in the stage of fruit set it contributes to the size of the fruits.

**NaturBlack** is a **natural soil activator containing humic acids** and ensure an ideal rooting of the plants.

**Calcito** strengthen the cellular walls and **improves fruit quality**, this helps positively to the **shelf-life** of the product. The use of **Calcito** is essential in **saline and calcareous soils** (also induced by irrigation water).

**Proser MnZn** improves **vegetative growth and blossoming**.

**FeboMix**, is high in Magnesium and Trace Elements complexed with lignosulfonates and it is able to **increase photosynthesis and vegetative growth**. Thanks to the properties of lignosulfonates (wetting, sticking and carrier agent), it can be mixed with other fertilizers and pesticides increasing their effectiveness.

**Giove Bio**, contains vegetal aminoacids (especially rich in proline and glycine) obtained by enzymatic hydrolysis and promotes a balanced vegetative development. **It activates the plant metabolism and makes it resistant to biotic and abiotic stress (heat, frost)**. Due to glycine, it has a carrier action.

**B-Power**, thanks to the particular formulation based on natural components of plant origin, performs a double action: **it activates the plant's metabolism and has an anti-stress effect**.

**Nano.T Fe** is a highly efficient Iron in nanoform, patented by FCP CERE A, requiring lower dosages. It prevents and/or controls ferric chlorosis.

**CalcioMagno** provides organic acids that gradually and constantly acidify the rhizosphere improving the assimilation of nutrients.

**K-Fast** performs an anti-stress action **supporting the plant in the delicate phase of fruit ripening**, allowing you to harvest quality fruit with a higher dry matter content, limiting the risk of over-ripening.

**Magnetical** is a calcium and magnesium based fertiliser, rich in sugar that brings energy ready to be used to the plant. **MAGNETICAL** improves **the shelf life and the qualities of the fruit (taste, firmness and colour)**.

Made  
in Italy

**Grow well  
to eat better**

# Technical Line

Product	Dosage	Type	Timing	Functions
LEAF P-CA + NATURBLACK	10-12 liters/ha + 3-5 liters/ha	Fertigation	7 days after transplanting	- Plant root system enhasment
LEAF P-CA + NATURBLACK	10-12 liters/ha + 3-5 liters/ha	Fertigation	14 days after transplanting	- Plant root system enhasment
CALCITO + PROSER MN ZN	10 liters/ha + 1 liters/ha	Fertigation	vegetative growth	- Vegetative growth - Plant reinforce- ment
GIOVE BIO + FEBO MIX (or FEBO BIO)	250-300 ml/100 l of water + 150-200 g/100 l of water (or 100-150 g/100 l of water)	Foliar	vegetative growth	- Flowering - Vegetation deve- lopment
NATURBLACK (or GIOVE BIO) + B-POWER	100-150 ml/100 l of water (or 200-250 ml/100 l of water) + 100 ml/100 l of water	Foliar	Flowering and fruit setting	- Flowering - Fruit setting
LEAF P-CA + GIOVE BIO + NANOT FE	10 l/ha + 4-5 l/ha + 4-5 l/ha	Fertigation	Flowering and fruit setting	- Reinforcement of the plant structure - Photosinstesys
CALCIO MAGNO + K-FAST	20 liters/ha + 10 liters/ha	Fertigation	Fruit growth	- Shelf life - Fruit size

**NOTE:** In case of biotic and abiotic stress, apply **Nano.T Cu** foliar at a dose of 250-300 ml/100 liters of water.
