

# Hazelnut

## Obtaining a good condition of the hazelnut preserving the shelf-life

**NaturBlack** is a concentrate of humic and fulvic acids that has a powerful anti-stress action, also promoting fruit set.

**Giove Bio Gold** is a biostimulant with anti-stress and carrier action, rich in plant amino acids and effective at low doses.

**Febo Mix** contains magnesium and iron to promote photosynthesis and microelements to stimulate the plant's metabolism.

Thanks to the action of nitrogen in synergy with calcium and magnesium, calcio-magno is particularly suitable in the stages of large fruit production to promote yield while safeguarding quality.

**Leaf P-Ca** contributes to the swelling of the hazelnut, furthermore calcium improves the resistance of the tissues making the plant more resistant to stress.

**K-Fast** determines the increase in dry matter and therefore in production yield. MagnetiCal is a calcium and magnesium fertilizer, rich in sugars that provides readily available energy to the plant. Calcium also helps make the plant stronger and more resistant to adverse climatic conditions.

**Oro-B** is composed of boron complexed with ethanolamine (an organic molecule that stabilizes and facilitates absorption). This formulation ensures rapid and uniform delivery of boron within plant tissues.

**SuprEmo** is made up of pure hemoglobin, capable of giving the plant a vegetative boost in the early stages, often characterized by low temperatures. It is rich in organic iron, which contributes to the optimal photosynthesis process.

**Grow well to eat better**

# Technical line

Product	Dosage	Treatment	Period
SUPREMO	20-25 l/ha	Fertigation	Vegetative growth
NANO.T FE	4-5 l/ha	Fertigation	Vegetative growth
RED BALL	300-500 kg/ha	Granular	Flowering
CEREASLOW 40	200-250 kg/ha	Granular	Fruit set
NATURBLACK	1,5 - 2 l/ha	Foliar	Fruit set
FEBO MIX	2 - 2,5 l/ha	Foliar	Fruit set
SUPREMO	20-25 l/ha	Fertigation	Fruit set
NANO.T FE	4-5 l/ha	Fertigation	Fruit set
GIOVE BIO GOLD	1,5 - 2 kg/ha	Foliar	Fruit enlargement
LEAF P-CA	4-5 l/ha	Foliar	Fruit enlargement
CALCIOMAGNO	20 l/ha	Fertigation	Fruit enlargement
K-FAST	10 - 15 l/ha	Fertigation	Fruit enlargement
SUPREMO	20-25 l/ha	Fertigation	Fruit enlargement
NANO.T FE	4-5 l/ha	Fertigation	Fruit enlargement
VINFRUTTO	300-400 kg/ha	Granular	post-harvest
GIOVE BIO GOLD	1,5 - 2 kg/ha	Foliar	post-harvest
ORO-B	1-2 l/ha	Fertigation	post-harvest
NANO.T FE	4-5 l/ha	Fertigation	post-harvest
SUPREMO	20-25 l/ha	Fertigation	post-harvest
