

Jolly

6.10.20+3CaO+22SO₃+7,5C-Org 2N-Org

Jolly is an organo-mineral NPK fertilizer obtained by granulation. It contains both organic and mineral matrices with a high nutritional value. Its high sulphur content improves the quality of the organoleptic aspects of crops. It has a high potassium sulphate content. It is ideal for fall

and spring fertilization of fruit trees.

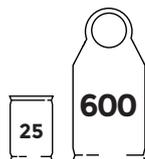

It contains 2% of slow-release organic nitrogen which guarantees a constant absorption over time. Phosphorus is soluble, therefore easily assimilable.
