Land Plus is an NPK mineral compound fertilizer with activator, obtained by granulation. It contains high-solubility and availability mineral matrices. The high amount of nitrogen in different forms (ammoniacal and ureic) and the synergy with sulphur improve the protein content in several crops. Its balanced formulation and

the presence of calcium, magnesium, sulphur and microelements ensure a complete nutrition to the plant. It contains humic acids.

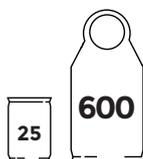

Land Plus is indicated for pre-sowing applications on cereal crops, oil crops and fruit trees.
