TrioStart is an organo-mineral NPK complex fertilizer rich in phosphorus which is totally assimilable.

The organic matrix which derives from hydrolyzed gelatin (rich in amino acids) improves the structure of the soil and ensures a slow-release nitrogen nutrition. The phosphorus present is not retrogradable because it is bound to a

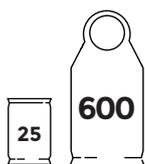

humic matrix (humic acids) which allows its complete assimilation. It is particularly suitable for the stimulation of the root system, to strengthen the plant and, in the meantime, to reintegrate soil fertility.
