

Citrus fruits

Orange, lemon and tangerine

Constant and balanced intake of iron to tackle deficiency, increase fruit set, improve quality and shelf-life.

HydroStar is a formulation made from pure and highly soluble raw materials with a high percentage of organic nitrogen. It is an effective product **at low doses, has a rooting and strengthening action of the plant while promoting flowering**, thanks to the presence of pure extracts of the alga *Ascophyllum nodosum*.

VigorGreen is a cold-extracted Canadian alga *Ascophyllum Nodosum*. The associated microelements (chelated iron DTPA, complexed boron and molybdenum) **stimulate the metabolism of the plant by improving flowering, fruit set and uniformity of production.**

Master, NPK organic-mineral fertilizer complex is characterized by a balanced ratio of nutrients that are easily absorbed thanks to the presence of humic acids.

Nano.T Fe ensures the constant availability of iron to the plant **favouring photosynthesis**, even in non optimal conditions, and **reducing the risk of iron chlorosis.**

StimUp carries out a biostimulant activity which **favours flowering and fruit set**, while the hormone-like activity allows to **obtain fruits with a higher caliber.**

NaturBlack is a concentrate of humic extracts, with activating action on the plant. Used by foliar **has physo-activating action** similar to auxin,

Leaf P-Ca improves flowering and strengthens plant tissues, during the fruit set it contributes to the swelling of the fruits.

SuprEmo Rich in essential amino acids and organic iron, biologically very active. Its constant use allows to keep the plants green and active.

Giove Bio Gold is a biostimulant with an **highly anti-stress action** that allows a balanced development of the vegetal system.

K-FAST increases dry matter thanks to its highly assimilable potassium content.

The use of **CalcioMagno** in fertigation reduces the risk of breakage and disintegration of the albedo, **increasing the shelf life of the fruit.**

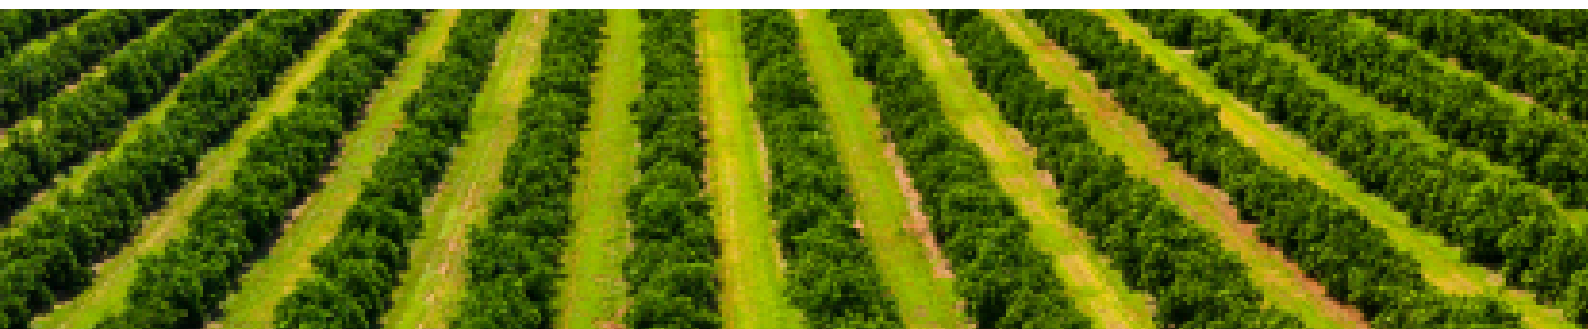

Grow well to eat better

Technical Line:

Product	Dosage	Treatment	Period
MASTER/MASTER PLUS Or LAND 30	300-400 kg/ha	Granular to the soil	Basal application
NANO.T FE + HYDROSTAR	5-10 l/ha + 10 kg/ha	Fertigation 1-2 interventions	From vegetative growth until pre-flowering
CEREA BLU	200 kg/ha	Granular to the soil	pre-flowering
STIM UP + GIOVE BIO GOLD + NATURBLACK	150 ml/ha + 1,5 kg/ha + 1,5 l/ha	Foliar	pre-flowering
STIM UP + GIOVE BIO GOLD + NATURBLACK	150 ml/ha + 1,5 kg/ha + 1,5 l/ha	Foliar	End of flowering
NANO.T FE + HYDROSTAR	5-10 l/ha + 10 kg/ha	Fertigation	Fruit set
CALCIO MAGNO (FOCUS CA) + K-FAST + SUPREMO	20 l/ha (15 l/ha) + 10 l/ha + 20 l/ha	Fertigation	Fruit growth
VIGOR GREEN + LEAF P-CA	1,5 l/ha + 4 l/ha	Foliar	Fruit growth
VIGOR GREEN + LEAF P-CA	1,5 l/ha + 4 l/ha	Fogliare	Invaiaatura

In saline, sodic, calcareous soils with alkaline pH add **CALCITO** at a dose of 10 l/ha every 25-30 days.
