## Fertigation <br> 20.20.20

Fertigation 20.20.20 is a water-soluble NPK crystalline fertilizer that can be applied in fertigation.
The balanced nitrogen, phosphorus, and potassium ratio makes it available for all stages of the crop cycle by providing a balanced nutrition. Nitrogen is present in three forms (nitric, ammoniacal, ureic) that ensure a constant release throughout the whole crop cycle. The high phosphorus content improves the root system
It contains microelements chelated with EDTA, that guarantee an easier assimilation preventing possible deficiencies and favouring biochemical processes.
It is particularly indicated for horticultural crops and fruit trees.

## PACKAGING

$10 \quad 25$

TIPOLOGY
CRYSTALLINE

## Dosages and uses

| Crop | Dosages | Period and method of use |
| :---: | :---: | :---: |
| citrus fruitsi | $20-50 \mathrm{~kg} / \mathrm{ha}$ | every $10-15$ days from fruit set to veraison |
| stone fruits | $40-100 \mathrm{~kg} / \mathrm{ha}$ | every $10-15$ days from fruit set to veraison |
| kiwi | $20-50 \mathrm{~kg} / \mathrm{ha}$ | every $10-15$ days from fruit set to veraison |
| olive tree | $20-50 \mathrm{~kg} / \mathrm{ha}$ | every $10-15$ days from fruit set to veraison |
| open field horticoltural | $40-100 \mathrm{~kg} / \mathrm{ha}$ | every $10-15$ days from post-transplant |
| greenhouse horticoltural | $4-8 \mathrm{~kg} / 1.000 \mathrm{~m} 2$ | every $10-15$ days from post-transplant |
| pome fruits | $40-100 \mathrm{~kg} / \mathrm{ha}$ | every $10-15$ days from fruit set to veraison |
| grapevine | $40-100 \mathrm{~kg} / \mathrm{ha}$ | every $10-15$ days from fruit set to veraison |

To be used in fertigation, apply according to the needs of the crop

The Fertigation products in the low chlorine content version can be used not only in fertigation, but also by foliar application.
The products are perfectly soluble in water.

For foliar application we recommend $\mathbf{2 - 4} \mathbf{~ k g} / \mathrm{ha}$ diluited in 400 L of water.
