

# Global

$3.12.22+4\text{CaO}+2\text{MgO}+3\text{SO}_3$

Global is an NPK mineral compound fertilizer obtained by granulation with high-solubility mineral matrices. The high content of potassium sulphate makes it ideal for crops sensitive to the presence of chlorine. The high content of soluble sulphur improves nitrogen absorption.

It contains magnesium, an important element in photosynthesis processes and an essential constituent of chlorophyll. Global.....

It is indicated for pre-transplant applications on horticultural crops, fruit trees and alfalfa.
