

Giove Bio

100% vegetal physioactivator

GIOVE BIO is a 100% vegetal concentrated physioactivator rich in vegetal amino acids (about 50%), obtained by enzymatic hydrolysis. GIOVE BIO thanks to the high content of organic nitrogen, readily assimilable, promotes a balanced vegetative development. GIOVE BIO is rich in glycine, an amino acid with a carrier action, which improves the effectiveness of the products associated with it, and proline, an amino acid with an anti-stress action, which promotes growth and productivity even in the event of unfavorable climatic conditions.

Benefits

- It has a biostimulating action thanks to the high presence of peptides, oligopeptides and free amino acids, all of vegetal origin;
- It activates the metabolism of the plant thanks to the high content of totally soluble organic nitrogen;
- It's environmentally friendly and innovative as it comes from the enzymatic hydrolysis of plant tissues;
- It increases the effectiveness of the products distributed together thanks to the co-formulating action of the amino acid matrix.

FORMULATION

Title and composition

Nitrogen (N)	Organic carbon	Total amino acids
8% ⁽¹⁾	25%	50%

(1) organic

Dosages and uses

Crop	Dosages	Period and method of use	Application
Fruit trees	4-5 l/ha	2-3 applications from vegetative development	Foliar
Grapevine and table grape	4-5 l/ha	2-3 applications from vegetative development	
Olive tree	4-5 l/ha	Vegetative growth, fruit swelling	
Open field horticultural	3,5-4,5 l/ha	Every 7 -10 days from transplant	
Horticultural in greenhouse	250-300 ml/hl	Every 5-7 days from transplant	
Cereals	2-3 l/ha	Booting, flag leaf	Fertigation
Fruit trees, Olive tree & Grapevine	10-15 l/ha	From vegetative growth	
Open field horticultural	10-12 l/ha	From post-transplant	
Horticultural in greenhouse	0,5-1 l /1000 m	From post-transplant
