

# Stone fruits

**Products easy to absorb  
obtained by high-quality matrices  
and the attention to nutrient demands  
in every phenological phase  
ensure high-quality fruits**

**HydroStar** is a formulation made from pure and highly soluble raw materials with a high percentage of organic nitrogen. It is an effective product at low doses, has a rooting and strengthening action of the plant while promoting flowering, thanks to the presence of pure extracts of the alga *Ascophyllum nodosum*.

**VigorGreen** is a cold-extracted Canadian alga *Ascophyllum Nodosum*. The associated microelements (chelated iron DTPA, complexed boron and molybdenum) stimulate the metabolism of the plant by improving flowering, fruit set and uniformity of production.

**Focus Ca** is effective at low doses even at low temperatures and, thanks to its acidic pH, can improve the absorption of nutrients in the soil

**Universal Up** contains nitrogen in different forms (nitric, ammoniacal, ureic) and a high content of soluble phosphorus. Humic acids facilitate the absorption of nutrients protect phosphorus from retrogradation (insolubilization).

**NaturBlack** promotes a rapid vegetative recovery thanks to the starter effect of phosphorus, which is fully assimilated, and humic and fulvic acids that help improve the resistance of the crop to stress.

**SuprEmo** rich in essential amino acids and organic iron, biologically very active. Its constant use allows to keep the plants green and active.

**Giove Bio Gold** stimulates flowering and fruit set, increases metabolism and promotes the recovery of the plant from stress.

**Leaf P-Ca** due to the high concentration of phosphorus and calcium completely soluble causes a better enlargement of the fruit.

The formulation of **Vinfrutto** allows a complete and balanced supply of essential nutrients for the plant.

**MagnetiCal** is a calcium and magnesium fertilizer, rich in sugars that provides energy readily available to the plant. MagnetiCal improves the organoleptic qualities of the fruit. Calcium also helps to make the plant stronger and more resistant to adverse weather conditions.

**Grow well to eat better**

# Technical Line

Product	Dosage	Application	Period
<b>UNIVERSAL UP</b> or <b>RED BALL</b>	200-300 kg/ha	Granular to the soil	Vegetative growth
<b>HYDROSTAR</b> + <b>SUPREMO</b>	10 kg/ha + 20 liters/ha	Fertigation ( 2 applications )	From vegetative growth until pre-flowering
<b>NATURBLACK</b> + <b>VIGORGREEN</b>	1,5 liters/ha + 1,5 liters/ha	Foliar	Fall of petals
<b>NATURBLACK</b> + <b>VIGOR GREEN</b>	1,5 liters/ha + 1,5 liters/ha	Foliar	After 8-10 days
<b>HYDROSTAR</b> + <b>LEAF P-CA</b>	10 kg/ha + 10 liters/ha	Fertigation	Stone enlargement
<b>VIGOR GREEN</b> + <b>MAGNETICAL</b>	1,5 l/ha + 3-4 l/ha	Foliar	
<b>HYDROSTAR</b> + <b>LEAF P-CA</b>	10 kg/ha + 10 liters/ha	Fertigation	Stone hardening
<b>VIGOR GREEN</b> + <b>MAGNETICAL</b>	1,5 l/ha + 3-4 l/ha	Foliar	
<b>CALCIO MAGNO</b> <b>(FOCUS CA)</b> + <b>SUPREMO</b>	20 l/ha (15 l/ha) + 20 l/ha	Fertigation	Veraison
<b>GIOVE BIO GOLD</b> + <b>MAGNETICAL</b>	1-2 kg/ha + 3-4 l/ha	Foliar	
<b>CALCIO MAGNO</b> <b>(FOCUS CA)</b> + <b>SUPREMO</b>	20 l/ha (15 l/ha) + 20 l/ha	Fertigation	10-15 before the harvest
<b>GIOVE BIO GOLD</b> + <b>MAGNETICAL</b>	1-2 kg/ha + 3-4 l/ha	Foliar	
<b>VINFRUTTO</b> or <b>GRANORO</b> or <b>FLEX</b>	300-400 kg/ha	Granular to the soil	Post-harvest
