

MagnetiCal

Foliar energizer based on calcium and magnesium

MagnetiCal is a liquid fertilizer rich in sugar which readily provides energy to the plant. The vegetal matrices and the subacidic pH favour a rapid and complete assimilation of calcium and Magnesium. The use of MagnetiCal increases the vigourness of the plant (better photosynthesis and metabolic activity), by strengthening and increasing the consistency of fruits; in this way it is possible to obtain a product of much higher quality.

Benefits

- The plant is more active thanks to the significant presence of sugar and magnesium;
- The plant is more robust and fruits have a better shelf-life thanks to the presence of calcium;
- Organoleptic qualities are enhanced (flavour, consistency and colour);
- It improves the effectiveness of other products employed (both fertilizers and/or pesticides), since it has an adhesive and carrier capacity.

FORMULATION

Title and composition

| Calcium (CaO) | Magnesium (MgO) | pH |
|---------------|-----------------|----|
| 12% (1) | 4% (1) | 5 |

(1) Water-soluble product, it also contains vegetal mono and polysaccharides

Dosages and uses

| Crop | Foliar dosages | Period and method of use |
|--------------------------------|----------------|---|
| Stone fruits | 3-4 l/ha | 3-4 applications from fruit set each 15 days |
| Pome fruits, kiwii | | |
| Grapevine and table grape | | |
| Citrus fruits | | |
| Open field fruit horticultural | 3-3,5 l/ha | 3-4 applications from fruit set |
| Open field leaf horticultural | 3 l/ha | 2-3 applications from 5-6 leaves each 8-10 days |
| Horticultural in greenhouse | 250-300 ml/hl | 3-4 applications from fruit set each 7 days |
| All crops | 10 - 20 l/ha | FERTIGATION |
