

Red Ball

12.6.15+35SO₃+0,5Fe

Red Ball is a mineral NPK complex fertilizer rich in nitrogen, potassium and sulphur to improve the protein content of several crops.

The elevated content of sulphur within the fertilizer acidifies the soil and allows a better assimilation of nutrients, moreover the ratio between N/K nourishes and strengthens the plant at the same time. Iron stimulates photosynthesis and has a greening action. Phosphorus keeps the root system active and receptive.

Title and composition

Nitrogen (N)	Phosphorus (P ₂ O ₅)	Potassium (K ₂ O)	Sulphur (SO ₃)	Iron (Fe)
12% (3) 2% (4)	6% (1) 5% (2)	15% (2)	35% (2)	0,5%
Low chlorine				

(1) soluble in neutral ammonium citrate and water- (2) water soluble - (3) total - (4) ureic

TIPOLOGY

GRANULAR

Dosages and uses

Crop	Dosages	Period and method of use
Stone fruits	400-500 kg/ha	post harvest / vegetative growth
Pome fruits	400-500 kg/ha	post harvest / vegetative growth
Actinidia	500-600 kg/ha	post harvest / vegetative growth
Citrus fruits	500-600 kg/ha	vegetative growth
Grapevine	400-500 kg/ha	post harvest / vegetative growth
Table grape	500-600 kg/ha	post harvest / vegetative growth
Olive tree	400-500 kg/ha	post harvest / vegetative growth
Cereals	300-400 kg/ha	pre-sowing
Horticultural	300-400 kg/ha	pre-transplant
