

Citrus fruits

Orange, lemon and tangerine

Constant and balanced intake of iron to tackle deficiency, increase fruit set, improve quality and shelf-life.

The organic matter of **BioNascor** is rich in amino acids, humic and fulvic acids that help with nutrient absorption. Phosphorus acts on plants in the early stages of development.

Nano. T Fe Bio guarantees a constant availability of iron to the plant, promoting photosynthesis even in suboptimal conditions and reducing the risk of occurrence of ferric chlorosis.

VigorGreen is a cold-extracted Canadian alga *Ascochyllum Nodosum*. The associated microelements (chelated iron DTPA, complexed boron and molybdenum) stimulate the metabolism of the plant by improving flowering, fruit set and uniformity of production.

Giove Bio Gold is a highly carrying anti-stress biostimulant that allows a balanced development of the plant system.

NaturBlack and **Giove Bio Gold** promote abundant blooms and fruit clusters, support the plant in case of environmental stress and promote photosynthesis.

Proser Ca is a product specific for the quality (color and dry matter) and shelf-life of the fruit. Proser Ca acts as an acidifying agent by improving the effectiveness of the products associated with it

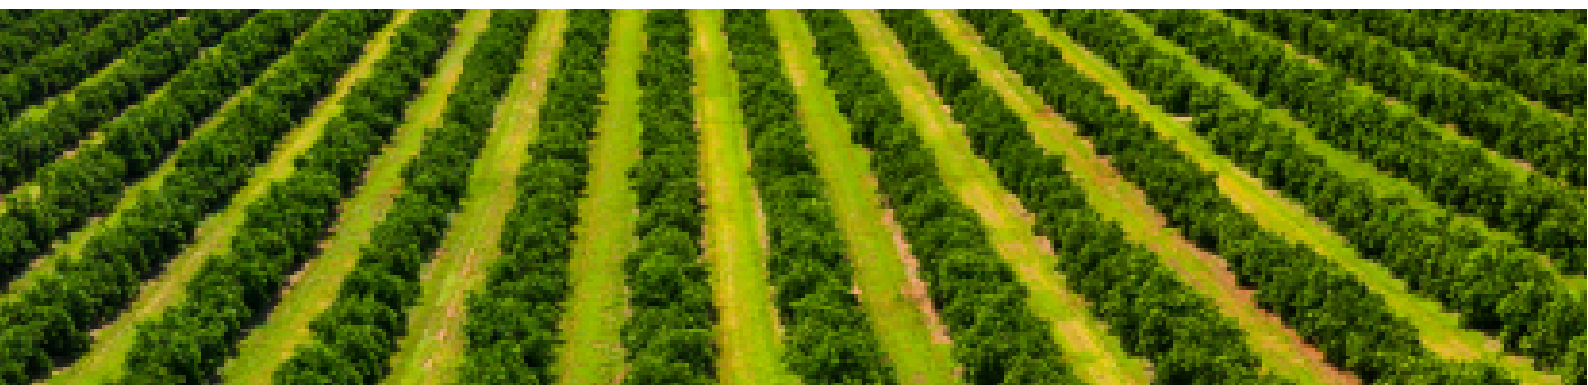

The use of **SuprEmo** promotes the assimilation of nutrients in the soil, has a reinverding action, thanks to the organic iron content and supports the plant in the fundamental phase of fruit growth.

Grow well to eat better

Technical Line:

Product	Dosage	Treatment	Period
BIO NASCOR + BIO MASTER	300-400 kg/ha	Granular to the soil	Basal application
NANO.T BIO FE + SUPREMO	5-10 l/ha + 20 l/ha	Fertigation 1-2 interventions	From vegetative growth until pre-flowering
VIGORGREEN + GIOVE BIO GOLD + NATURBLACK	1,5 l/ha + 1,5 kg/ha + 1,5 l/ha	Foliar	pre-flowering
VIGOR GREEN + GIOVE BIO GOLD + NATURBLACK	1,5 l/ha + 1,5 kg/ha + 1,5 l/ha	Foliar	End of flowering
NANO.T BIO FE + SUPREMO	5-10 l/ha + 20 l/ha	Fertigation	Fruit set
SUPREMO	20-40 l/ha	Fertigation	Fruit growth
VIGOR GREEN + PROSER CA + GIOVE BIO GOLD	1,5 l/ha + 2-3 l/ha + 1 kg/ha	Foliar	Fruit growth
VIGOR GREEN + PROSER CA + GIOVE BIO GOLD	1,5 l/ha + 2-3 l/ha + 1 kg/ha	Foliar	Veraison
